PARTNERSHIPS

Dupla for associations, clubs and schools.

An app built in Lisbon that matches each client with the right professional and gives professionals the tools to keep them.

The problem.

Personal trainers depend on the gym floor and Instagram to find clients, and lose them without knowing why. People looking for a trainer don't know how to choose: everything looks the same, and reviews don't say who is right for their goal.

Dupla.

1. Matches each client with the right professional — by goal, injuries, schedule and coaching style, with verified skills; every match explains why.
2. Gives the professional the tools to keep the client: chat, session booking, training plans, progress reports and alerts when a client starts to drop off.
3. Keeps the professional in control: nothing the app suggests reaches the client without their approval.
4. Only accepts qualified professionals: the IPDJ professional title for exercise technicians, membership of the Ordem dos Nutricionistas.

With clubs, not against them.

Professionals keep working where they work. The club gains professionals with fuller diaries and clients who stay longer.

What we propose.
A pilot in Lisbon.

1

For your professionals

A free 12-month listing and in-person help setting up the profile.

2

We measure together

Active profiles, client requests and booked sessions.

3

Aggregate numbers only

We share the totals, never client data.

- **No cost to your organisation.**
